DIABETES A Growing Epidemic in India

In 2021, 74,194,700 people had diabetes.

1 in 12 Indians is

living with diabetes, 2nd highest in the world.

currently aged 20 years in India are likely to develop diabetes in their lifetime. 12.1 million people

with diabetes are aged > 65 years.

is the

average annual expenditure of a person with diabetes.

Causes for concern

Hypertension, obesity, and family diabetes history are risk factors in both urban and rural areas

 Diabetes more common among the affluent in rural India
It's prevalence is higher among poor in the urban areas of affluent states

Need Feed INDIA Gives you Solution

WELL DIABO Pravahi Kwath

Well Diabo Pravahi kwath is a thoughtfully crafted herbal blend designed to support individuals managing diabetes. It helps regulate blood sugar levels, ensuring better glycemic control and minimizing fluctuations. By promoting healthy pancreatic function, it aids the natural production and regulation of insulin, essential for maintaining balanced sugar levels.

Rich in antioxidants, it helps combat oxidative stress, reducing the risk of diabetes-related complications. Additionally, it supports digestive health and enhances insulin sensitivity, offering a holistic approach to diabetes management.

NEW TRACT

Boosts Immunity - Strengthens the body's defense system, helping to reduce the risk of infections and improve overall health.

Enhances Metabolism - Boosts metabolic function, promoting better energy utilization and efficient glucose processing.

Nutrient Richness - Packed with essential nutrients that nourish the body and support overall well-being.

Pancreatic Function - Supports healthy pancreatic activity, aiding in the natural production and regulation of insulin.

Regulates Blood Sugar - Helps maintain stable blood sugar levels, reducing fluctuations & promoting better glycemic control.

DIABE WELL Powder

The combination of Aloe vera, Swara Haritaki, Bibhitaki, Karela, Jamun, Neem, Gurmar, Nirgundi, Methi, Tulsi, Haldi, Amalaki, Cinnamon, Ginger, Long, and Mamejava offers a diverse range of potential benefits for individuals with diabetes. These natural ingredients have been traditionally used for their properties that can help manage various aspects of diabetes.

Aloe vera supports blood sugar regulation due to its hypoglycemic effects and potential to enhance insulin sensitivity. Swara Haritaki, Bibhitaki, and Amalaki, collectively known as Triphala, aid digestion, essential for nutrient absorption and stable blood sugar levels.
